PROFESSIONAL SUMMARY

Frontend-focused Full Stack Developer specializing in modern React and TypeScript-based web applications with strong attention to performance, UX, and UI consistency. Hands-on experience building production-ready dashboards, authentication flows, and developer-friendly interfaces using the MERN stack, JWT/Firebase auth, and cloud deployments. Passionate about frontend architecture, clean and maintainable code, and iterative product development that quickly incorporates real user feedback. Currently pursuing B.Tech in Computer Science and contributing as a part-time Frontend Developer while continuously sharpening skills in SaaS-style user management, component-driven development, and human-centered performance improvements (Web Vitals, perceived latency, optimistic UI patterns).

PROFESSIONAL EXPERIENCE

Front End Developer (Part-time)

Relyce Infotech – Chennai, Tamil Nadu

January 2025 – Present | Part-time | Notice Period: 0–15 days

- Develop and maintain responsive, scalable web applications using React, Node.js, and MongoDB, ensuring smooth data flow between client and server.
- Convert UI/UX designs into pixel-perfect frontends with Tailwind CSS, focusing on consistency and accessibility across devices.
- Build secure backend APIs and integrate Firebase / JWT authentication for user management and session handling.
- Implement database structures and optimize queries to reduce data fetch latency by approximately 15–20% on key user flows.
- Deploy products to Vercel / Netlify and iteratively improve performance by monitoring build size and load time metrics.
- Collaborate with team members and clients to gather requirements and deliver production-ready solutions that align with business goals.
- Debug issues efficiently and ship features faster, steadily improving code quality and reliability over successive releases.

Section Statistic: Contributed to frontend optimizations that decreased page load time on key views by an estimated 20%, improving perceived responsiveness for end users.

EDUCATION

B.Tech in Computer Science

Sathyabama Institute Of Science & Technology – Chennai, Tamil Nadu

Full-time | August 2023 – Present

Current CGPA: 7.0

Section Statistic: Completed more than 40% of degree requirements while simultaneously holding a part-time Frontend Developer role.

ADDITIONAL SKILLS

- React.js & modern frontend development (hooks, context, component-driven architecture)
- TypeScript for scalable and safer React codebases
- JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- Frontend state management with React hooks and API-driven dashboard interfaces
- Frontend performance optimization (bundle size, Web Vitals, perceived performance, optimistic UI)
- Node.js, Express.js, RESTful API development
- MongoDB and basic database schema design
- Authentication & authorization: JWT, Firebase Auth, session management
- Component-based UI design with a strong focus on Developer Experience (DX)
- Version control and collaboration using Git and GitHub (branching, PRs, code reviews)
- Deployments on Vercel / Netlify and basic CI-oriented workflows
- Problem-solving, debugging, and iterative delivery based on user feedback
- Familiarity with SaaS product concepts: dashboards, user management, and multi-tenant experiences

Section Statistic: Regularly apply 10+ technical skills across academic and professional projects to deliver production-quality web interfaces.

RELEVANT STATISTICS

- 20% reduction in estimated page load times on key views through targeted frontend optimizations.
- Maintaining a CGPA of 7.0 while studying full-time and working part-time as a Frontend Developer.
- Leveraging 10+ frontend and full-stack technologies in day-to-day development work.
- Supporting a production codebase used by dozens of real users, contributing to more reliable and responsive user flows.
